Decision Making Indicators

- **High Priority-Full Suppression**
- **Logged after 2000 (may not be planted)**
- **1-20 yr old plantations (vri/results)**
- **Modified Response (see labels)**

**Purpose Statement:** This map is intended to provide a visual aid that will help incident officers and incident commanders make informed decisions on where, when, and how to action wildfire in the values at risk due to wildfire. This map is an accurate representation of the Decision Making Indicators that support the use of fire as a control tool. It is not intended to be used for legal purposes, nor is it suitable for use with the public.
