Savory Ridge UWR

2010/2011 Project Work
Fuel Management Treatments

- In the early winter of 2010 a contract was awarded to Avison Management Services.
- The prescription was for spacing, pruning, and ladder fuel removal over 46.25 ha.
- The contract price per hectare was $900.
- The goal was similar to other previously treated units: prepare the stand for prescribed burning in order to reduce the fuel hazard and increase the productivity of the UWR.
